

*Credit & Management Systems, Inc. announces  
Reseller and Partnership Programs*

**Lake Bluff, IL June 10, 2009**

With the upcoming release of CMS's new CCM-Online Software as a Service product, CMS has announced two new initiatives to identify Partners and Resellers for mutually beneficial relationships.

**Partners Program:**

CMS is currently working in close cooperation with a growing number of corporations, associations, organizations, and individuals specializing in B2B supply-chain solutions for companies of any size. To expand and grow market exposure, CMS continues to look to partner with firms and individuals whose solutions can provide a mutual benefit and potential for new customers and new markets for both parties. CMS is looking to partner with high quality, well established firms and individuals who are interested and who can benefit by joint-marketing opportunities for their and CMS's products and services.

**Reseller Program:**

In addition to its current inside Sales staff, CMS is looking to expand its outside sales opportunities through Reseller relationships, both domestically and internationally. CMS is looking for firms and individuals who are already marketing Software as a Service (SaaS) products and services, and who wish to expand their offerings to new customers and into new markets. Specific areas of interest include firms or individuals with backgrounds and experience in B2B supply-chain specialties and who have complementary products or services to CMS in the credit and collections space.

---

Parties interested in exploring either of these opportunities should visit the CMS website at [www.icmsglobal.com](http://www.icmsglobal.com), click on either the "Become a Partner" or "Become a Reseller" link, and submit your contact information. Or, call (847) 735-9700 and press extension 2 to leave a message for the CMS Sales and Marketing group. A representative will contact you as soon as possible in either case.
